

Curan Man

Compact ready to use male device

man

The Curan Man features a unique, compact, comfortable and discrete design. The catheters are ready to use and extremely user friendly. Our catheters come in individual, sterile, single-use packages and are free from aggressive softening agents such as DEHP. The catheters are pre-lubricated with a smooth hydrogel coating, which is mess free with no liquid spillage. Each catheter is individually tested and guaranteed safe to use. All of our catheters feature smooth polished eyelets, making insertion risk-free and preventing irritation. The Curan Man is stored in its fully extended configuration in the boxes and you can easily carry it with you by folding the catheter up and storing it in a pocket or bag. The Blue Clips secure the catheter in its compact folded shape easily and comfortably. All catheters feature a universal, soft, colour-coded and flexible connector.

• 30 pieces packaged

• Polished Eyelets

• Compact Design
