We are working for a better quality of life by collaborative innovation

Curan meets the needs of the user, the prescribers and the market. Curan is primarily focused on its users. In other words, we develop all catheters and associated products based on the demands of users. And we have succeeded: more than 70% of people who use Curan catheters for the first time want to continue using them.

Our mission is to improve quality of life for people with incontinence. We achieve this by developing, producing and distributing high-quality products, which offer our users a comfortable, hygienic, pain-free and problem-free solution for intermittent catheterization.

Curan's priority is a client-centred approach that involves both collaboration and innovation. Together with exclusive distributors, users, professionals, suppliers and strategic partners we work hard to develop a well-balanced programme of products and services.

Corporate and social responsibility is an important part of our company's vision. We therefore also require our suppliers and strategic partners to meet stringent requirements in this area.

The main advantages at a glance

- ✓ Smooth fire-polished eyelets, making insertion risk free
- ✓ Phthalate free
- ✓ Features a universal, soft, colour-coded and flexible connector
- ✓ With Blue Grip hygienic non-touch device
- ✓ Discreet, comfortable and attractive design
- ✓ Extremely user-friendly
- ✓ The catheters are packaged individually and sterile, for single use

The focus at Curan is asking questions, listening, and doing research. We develop and produce high-quality, innovative products, made according the wishes of users and professionals.

Safe self-catheterization

Emptying your bladder using a catheter. Of course you would like to do this as easily, as comfortably and as discreetly as possible. This is something we at Curan understand, which is why we make our catheters according to both your wishes and those of health professionals. And why we continuously update and improve our products. Curan meets your needs

Curan helps you take control of your bladder

Whatever your bladder problem, Curan catheters will make your life that bit easier. Regular self-catheterization keeps your bladder healthy. It prevents unwanted urine leakage, infections and kidney problems. Read in this brochure which catheter suits you best.

Curan Man

Compact ready-to-use male catheter

Compact ready-to-use male device

The Curan Man features a unique, compact, comfortable and discrete design. The catheters are ready to use and extremely user-friendly. Our catheters come in individual, sterile, single-use packages and are free from aggressive softening agents such as phthalate free. The catheters are prelubricated with a smooth hydrogel coating. Each catheter is individually tested and guaranteed safe to use. All of our catheters feature smooth polished eyelets, making insertion risk-free and preventing irritation.

The Curan Man is stored in its fully extended configuration in the boxes and you can easily carry it with you by folding the catheter up and storing it in a pocket or bag. The Blue Clips secure the catheter in its compact folded shape easily and comfortably. All catheters feature a universal, soft, colour-coded and flexible connector.

The main advantages at a glance

- ✓ Compact design which is easy to store in a pocket or bag
- ✓ Ready-to-use straight away
- ✓ Pre-lubricated with a smooth hydrogel coating wich is mess-free and prevents liquid spillage
- ✓ Package is secure and safe and can be stored in a pocket or bag after use

The Curan Man catheters are 30 cm long and are available in the following charriere sizes:

Curan Man			
Product code	Size	Pack	Colour code
CM12 Compact ready-to-use male device	Ch 12	box of 30	□ White
CM14 Compact ready-to-use male device	Ch 14	box of 30	■ Green
CM16 Compact ready-to-use male device	Ch 16	box of 30	■ Orange

Each box of 30 units contains 5 clips to secure the Curan Man in its compact and folded shape.

Curan Lady

Compact and extremely user-friendly female catheter

Compact ready-to-use female device

The Curan Lady is unique by its compact, attractive and elegant design. The catheters are ready to use and extremely user-friendly. The catheters are supplied in individual, sterile, single-use packages and free from the aggressive softening agent phthalate. Each catheter is individually tested and guaranteed leakage-free. All of our catheters feature polished eyelets, making insertion riskfree and preventing irritation. All urine collection bags available on the market can be used in combination with this product.

The main advantages at a glance

- ✓ Compact and elegant design
- ✓ Ready to use straight away
- ✓ Pre-lubricated with a smooth hydrogel coating which is mess-free and prevents liquid spillage
- ✓ Package is secure and safe and can be stored in a handbag or pocket after use

The Curan Lady catheters are 12 cm long and are available in the following charriere sizes:

Curan Lady			
Product code	Size	Pack	Colour code

A person is sitting on a train platform, leaning back against a concrete wall. In the foreground, a pink suitcase is open, and a laptop is resting on it. The background shows a train platform with a black metal railing, a train, and a large glass and steel structure of a train station. The sun is shining brightly, creating a warm, golden glow.

Safe intermittent catheterization with Curan

Throughout Europe we supply a fine selection of user-friendly catheters for intermittent use – in the clinic, at home and away from home. All Curan products are free from latex and aggressive softening agents (phthalate free) and provided with smooth polished eyelets, which allow for risk-free insertion and prevent irritation.

*"Thanks to the catheters
of Curan Lady, i can
relax when i travel."*

Curan Advantage-range

Available in Man, Lady, and Unisex

For easier and safer catheterization

Curan Advantage hydrophilic coated catheters are immediately ready for use. The water pocket is leakage free and filled with sterilized water, which can easily be opened with a light pinch. The sterile water activates the user-friendly, hydrophilic comfort coating in roughly 25 seconds. The handy hanger allows you to hang the package vertically in any space during the activation of the coating. In the meantime, the user can prepare for the catheterization. Furthermore, these catheters feature the unique Blue Grip®, a handy tool for inserting catheters without making contact with the hand. The Blue Grip® is convenient, more hygienic, and significantly decreases the chance of infection. All Curan catheters feature smooth, polished eyelets to prevent irritation during insertion. They are also free of aggressive softening agents like phthalate. Each catheter is tested individually and is guaranteed for safe and comfortable use.

The main advantages at a glance

- ✓ The package is easy to open
- ✓ After use, it is easy to close and guaranteed leakage free
- ✓ Ready to use with an integrated water pocket
- ✓ Extremely user-friendly due to the smooth, hydrophilic comfort coating

Curan helps you take control of your bladder

Whatever your bladder problem, Curan's catheters will make your life that bit easier. Regular self-catheterization keeps your bladder healthy. It prevents unwanted urine leakage, infections and kidney problems. The catheters are provided with smooth polished eyelets so that insertion is not only safe, comfortable and pain-free, but also risk-free and free from irritation.

Curan Hydrophilic

For intermittent self-catheterization, phthalate free

For intermittent self-catheterization, phthalate free

The Curan hydrophilic coated catheters are provided with a hydrophilic coating and free from the aggressive softening agent phthalate. They are packaged sterile and individually, for single use. Both the male and the female catheters are fitted out with smooth polished eyelets, which makes insertion risk-free and prevents irritation. Furthermore, all male catheters are fitted out with an unique Blue Grip®; an ingenious tool for inserting the catheters without having to touch it with the hands. This is much easier, more hygienic and it considerably reduces the risk of infections.

The main advantages at a glance

- ✓ Extremely user-friendly due to the smooth, hydrophilic comfort coating
- ✓ User-friendly packaging
- ✓ Smooth fire-polished eyelets, making insertion risk free
- ✓ Male catheters are fitted out with the unique Blue Grip® tool

A photograph of three people in a meeting. On the left, a man with a beard and glasses is smiling and gesturing with his hands. In the center, another man is smiling and looking at a tablet. On the right, a woman is partially visible, also smiling. The background is a wall covered in many colorful sticky notes (pink, yellow, green, blue).

"The Curan catheters are easy and comfortable to use - no other brand will do for me!"

*“Thanks to the catheters of Curan Man,
I can get back in my old rhythm again.”*

"Fortunately, I can rely on the quality of my Curan Advantage Man catheters."

Curan: specialist in intermittent catheterization

Curan works with medical specialists on the creation of top-quality catheters.

✓ Made according to the wishes of users and professionals

✓ Based on years of knowledge and experience

✓ Extensively tested, so safe and reliable

✓ User-friendly and innovative products

Continuous improvement

Thanks to our knowledge and many years of experience, we can develop innovative products of the highest quality. And we are doing all we can to keep quality at this high level. That is why we regularly ask users and professionals, such as doctors and nurses, about their experiences and ideas. At our very well equipped Research & Development department, we develop and test new products. Our primary goal is always to develop innovative, comfortable products that make life easier for both users and professionals.

All Curan products carry CE marks and our production unit has EN ISO 13485:2012 certification. Furthermore, our cleanroom is certified according to class 10,000.
